HW6

a) I tested my program by running the unit test program that was provided for VM.java. For HW6.java I tested by commenting out sections of code to identify my error then thinking of why it is wrong and fixing it.

b) It took me a while to realize that I had to fill in every function in VM.java in order to run the unit tests on it. After I wrote the whole VM.java file, I had a lot of errors in the unit tests that I went to go fix one by one.
